Office Action Summary	Application No. 10/748,993	Applicant(s) HUEBL, JOCHEN	
	Examiner Vernal U. Brown	Art Unit 2635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 29 December 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The application of Jochen Huebl for Method And Device for Waking Users of A Bus System And Corresponding Users filed December 29, 2003 has been examined. Claims 1-11 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Millsap et al. US Patent 6484082.

Regarding claims 1, 4-5, 7 Millsap et al. teaches a device for waking users of a bus system comprising:

a detection device (ECU) for detecting a signal feature (high level) of the signal transmitted on the bus system (col. 6 lines 44-49) and for initiating wake procedure once a pre-selected number with respect to the signal feature has been reached (col. 6 line 66-col. 7 line 2 , col. 7 lines 38-45).

Regarding claim 2 and 6, Millsap et al. teaches the detection device includes a timer (col. 7 lines 41-42).

Art Unit: 2635

Regarding claim 8, Millsap et al. teaches transmitting a wake up message and evaluating the message as a wake up message and a corresponding signal feature is detected (col. 7 lines 38-45).

Regarding claims 9-10, Millsap et al. teaches determining the a time duration following a first occurrence of the signal feature and detecting the binary information results from the time duration following the first occurrence by monitoring the bus for a period of time for the message indicating which user of the bus to be activated (col. 7 lines 38-45)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Millsap et al. US Patent 6484082 in view of Kohlschmidt US Patent 6029061.

Regarding claim 3, Millsap et al. teaches detecting the signal feature (high level) (col. 6 lines 44-49) but is silent on teaching the signal feature includes one of an edge and an edge change of a signal. One skilled in the art recognizes that a change in signal edge is conventionally used to detect a signal as evidenced by Kohlschmidt (figure 4).

Art Unit: 2635

It would have been obvious to one of ordinary skill in the art for the signal feature to include one of an edge and an edge change of a signal in Millsap et al. as evidenced by Kohlschmidt because Millsap et al. suggests detecting the change in signal on the bus and one skilled in the art recognizes that a change in signal edge is conventionally used to detect a signal as evidenced by Kohlschmidt .

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kohlschmidt US Patent 6029061 in view of Millsap et al. US Patent 6484082 and further in view of Selin US Patent 5914796.

Regarding claim 11, Millsap et al. in an art related bus control system teaches transmitting a wake message and the message is evaluated to determine which user is to be selectively awaken (col. 3 lines 16-25) but is silent on teaching retransmitting the wake up message. One skilled in the art recognizes that a message is generally re-transmitted over a bus when the message is not correctly received by its recipient as evidenced by Selin (col. 7 lines 25-29) in order to deal with data collision on a bus.

It would have been obvious to one of ordinary skill in the art to transmit a wake up message evaluating the message, and retransmitting the message in Millsap et al. as evidenced by Selin because Millsap et al. suggests transmitting a wake up message and one skilled in the art recognizes that a message is generally re-transmitted over a bus when the message is not correctly received by its recipient (as evidenced by Selin) in order to deal with data collision on a bus.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vernal U. Brown whose telephone number is 571-272-3060. The examiner can normally be reached on 8:30-7:00 Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on 571-272-3068. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
